## A space that truly feels like you

Your home, it's where you work, sleep, learn, meditate, cook, garden, work out and cool down. It expresses who you are. Now more than ever. So why not design it that way? We couldn't agree more. At Moduleo, we are firm believers of self expression. It's why we design floors in the first place. Because a space that truly feels like you, begins with a floor that feels like you.

Whether you're thinking of stone, wood or maybe herringbone, we make sure you have a solid foundation to start from. Our premium floors are designed to keep up with life. And as for your own unique style? Our Roots collection is as diverse and vivid as nature itself. From warm classics like oak and walnut to serene, natural stones and playful terrazzo. You're bound to find a floor that fits your unique way of living.

# Creating the Roots collection: a look behind the scenes

"When you are searching for a floor, don't just decide with your eyes. Be mindful of the colour, the size, the structure, the pattern, the feeling it evokes, …"

A talk with Cindy Van Moorleghem and Elise Bylo, Moduleo's very own Brand Director and Design Manager, on matching your interior with your personality and the trends that ultimately shaped the Moduleo Roots collection.

**Let's dive right in. How and where did it all start for Moduleo?** Cindy: "Well, in 2022 we celebrated our tenth birthday, so we've been around for quite a while now. We were the first to produce luxury vinyl tiles on European soil. The funny thing about vinyl is that it's such an interesting material, even though a lot of people don't necessarily think of it that way. For one, it's one of the most durable materials out there. It's easy to maintain, install and recycle. Furthermore, it's beautiful, affordable, and so much more versatile than wood or stone."

Elise: "Yes, just think about it, you'd probably never pick a walnut floor for your bathroom. Wood and water aren't exactly a great match. But with a vinyl floor that looks and feels like real walnut, you don't have to worry about that. You can even take it a step further with matching skirtings and profiles. Or a staircase in the exact same style. It's never just about the floor, you see. We always envision the bigger picture. The complete spatial experience."

Cindy: "And then there's the sensorial aspect too of course. Vinyl actually soaks up the sound of your footsteps. It also feels warm and comfy. So, when we're designing a floor in our Design Studio, it's never limited to looks. We always think about how it feels and sounds too. How it affects every one of your senses."

Cindy Van Moorleghem

Elise: "Every detail has to make sense. Our designs have to feel, sound and look just right. We've always done this, but in the last couple of years we noticed more and more of our customers paying attention to it as well."

**That's probably not the only change you noticed in these past couple of years. Which other trends do you have on your radar?** Cindy: "First of all, a lot of us are more attentive to the materials, colours and textures we let into our home. We really reconnected with our surroundings. And with nature too. We even want to pull the outside indoors. Rightfully so, because it can have a huge effect on your wellbeing."

“We really want to encourage people to play around with it. Because that’s how you’ll ultimately find a floor that feels just right for you.”

Elise: “We also noticed the rise of tactility in materials. People want to feel things again. The fact that we’re living in an increasingly digital world, where everything takes place on a flat screen, only adds to this.”

Cindy: “We reconnected with ourselves too. People got thinking. What’s my identity? How can I express myself? In my clothing. In my home. They want their interior to match their own unique personality and have a bigger say in creating it too. And that freedom to be who you are and express it in your home, is something we firmly believe in at Moduleo. It’s why we design floors in the first place. So that people can create their own unique living spaces.”

Elise: “But we don’t just want to offer them the floors to do so, we want to inspire them too. Show them what’s possible and trigger their imagination. That’s why we browsed the world of design, architecture, art and even fashion to curate some of the most exciting new trends, materials, patterns, colours and finishes. And we brought them together into six captivating interior themes.”

**Sounds exciting. Tell us more about the creative process behind the Roots collection and these six interior themes.** Elise: “Well, we always look at what’s going on in the world first. In this case, it was getting back in touch with ourselves, nature and our surroundings. From there on we searched for ways to translate these macro trends into actual design characteristics. The sensory and tactile features of the Roots collection are the result of this.”

Cindy: “For the six interior themes, we consulted some trend forecasters and visual artists to brainstorm with. With the global trends and our own design vision in mind, we mixed and matched samples from our Roots collection with different types of fabrics, minerals, plants, furniture, and art until everything felt just right. It was a very intuitive process. Ultimately, we ended up with a refreshing, versatile collection and six totally different interior themes.”

Elise: “Each theme comes with its own aesthetic and different moodboards. It doesn’t mean you have to stick to one in particular though. On the contrary. Once you dive into one theme world, you still have so many options. You could go for a lighter or darker colour palette. Serene patterns or more tropical ones. Futuristic textures or classical ones. There are no limits really.”

Cindy: “We mixed and matched samples from our Roots collection with different types of fabrics, minerals, plants, furniture, and art until everything felt just right.”

# We think beyond the obvious

Elise Bylo

# Create, mix & match

## Six themes to get you started

Picking a floor can be challenging. But we are here to guide and inspire you along the way. We browsed the world of interior design to curate some of the most exciting new colours, materials, shapes, and furniture. And we matched them with our Roots collection. The result? Six thrilling interior themes, each with their own aesthetic and feeling. They are yours to explore. A tip from our designers: don't limit yourself to just one. Play around with all of them and go with whatever feels right.

# Breeze in the north

Mustang Slate
70177

Bring the pure, reviving experience of the Arctic area into your home. How? Tap into the crystal clear hues, icy blues and soft pastel shades of the iridescent Nordic sky to pin down your colour palette.

Blend fresh whites, grey wood structures and natural raw stones and top it off with smooth metallic accents that trigger your senses. And there you have it: an serene understated interior with an outdoor twist.

## Escape to the desert

Feel the need to unwind when you come home? Surround yourself with warm, soothing colours like earthy browns and terra tones and find some peace of mind among the infinite landscapes of the desert.
Or bring a hint of those endless sand plains indoors with a light natural stone or subtle terrazzo combined with a weathered wooden surface. Little hints of rose gold will add a spark of elegance.

# Orbit the future

Mustang Slate
70939

Unknown desolate planets with raw stone surfaces, unidentified glittering accents and other worldly colours. Outer space is so alluring. All the more reason to draw inspiration from these new territories and enrich your home with dark tones, silver weathered metallics and exciting new structures. Combined with retro-futuristic styling in lighting, art, and collectible design, this palette brings you to other galaxies, but still feels familiar.

Feeling funky? Colour blocking is the way to go. Add blue or orange to create vivid contrasts.

# Designed to fit your life

- Easy to install
- Excellent water, scratch and stain resistance
- Up to 25-year warranty
- Excellent dimensional stability

A splash of water in the bathroom, a splatter of ketchup in the kitchen or a book slipping out of your hands in the bedroom, it's a part of life. But homes are meant to be lived in, right? That's why our floors are built to last and keep up with your way of living.

- Natural patterns
- Authentic detailing
- Lifelike textures
- A finish that matches the design

The subtle grooves of real oak? You'll feel them. The cloud-like colour changes in concrete? You'll see them. The matt look that comes with a sandstone finish? Yes, you'll experience that as well. A natural look and feel, that's our goal. And so, we design our floors with all of your senses in mind.

Whether you're walking around in heels, sneakers or barefoot, you are in for a treat either way. Our floors don't just feel warm and comfortable, they soak up the sound of your footsteps as well. Installing underfloor heating or cooling? Go ahead. Our floors can handle it.

- Absorbs sound
- Feels warm
- Fit for underfloor heating and cooling

moduleo

# Made and designed in Belgium

## The Belgian way

We are proud of our Belgian roots. Belgian design is known and acknowledged all over the world. Because we have a unique point of view on the world and a distinct way of doing things. We're eager to pick up on what's happening in society by being open minded and empathetic. Not just in design, but in fashion, art, architecture, and music too. Just think of Ensor, Magritte, Horta or Dries Van Noten. At the same time, our modest nature always keeps us with our feet firmly on the ground. And that's how we are able to find the perfect balance between creativity and realism in our designs. Time and time again.

## 100% Belgian 100% Moduleo

From researching and testing to designing and producing, everything is done in-house. Right here in Belgium. Why? So we can be in charge of the entire production process and push the boundaries of our craftsmanship in every single step of it. It's easier for us, better for the planet and good for you. Because your vinyl floor will turn out exactly the way we envisioned it. Made to last. On trend. And fit to match your unique way of living.

Made and designed in Belgium

## We design & develop in-house

# Strong floors
# Small footprint

To us, sustainability starts off with making our floors in Belgium. So we can keep a close eye on the production process and have full control over all raw materials. But that's only the beginning of the story. We are taking concrete actions to reduce our environmental impact by 2040. No empty statements, we just take action based on science-based facts to deliver our sustainability promise.

## Powered by the wind

A third of the energy that powers our factory comes from wind turbines. And that's a lot. It equals the energy of more than 20 000 households. And our search for new green energy sources continues.

## Cooled down by the river

When it comes to smart green solutions, we simply go with the flow. The river Scheldt's flow, to be specific. We use an innovative closed circuit that pumps river water and cools down the factory machines. That's how we save a maximum amount of energy.

## Recycled materials

Our floors are fully recyclable and made with recycled materials of verified origin. Next to that, we only work with eco-friendly packaging solutions. And simply use less of it altogether.

## Minimal waste

Anything we don't use, we reuse. PVC waste from the production process always comes back to the circuit.

## Clean inks and coatings

To print our patterns and designs, we only use Reach approved raw materials and water-based instead of solvent-based ink. The same goes for the protective layer. This way, the air in your home stays clean and fresh. And it helps us cut down the overall carbon footprint of our products.

## Zero impact by 2040
## That's the goal

moduleo

# Finish in style

## Design strips

**Create your own visual effect**

Match the Design strips with your floor or make it stand out, it's up to you. These flexible joint features come in 11 colours. They match our Roots collection in height and colour, so it's very easy to create zonings. Want to imitate a tile grout joint or a ship deck with planks? Sure, why not. Get creative.

Discover more tips on how to install your Moduleo floor

## Matching or paintable skirtings

**Match them with your floor or your wall**

Perfect your interior with matching skirtings. They have the same colour, design and texture as your Roots floors, so they're great to create a smooth transition. Your other option? Match them with your walls. In that case, opt for paintable skirtings. Just paint over the skirting - they are already pre-primed.

Create a strong visual effect or natural grouting with our designs strips

## End profile in metal

**Design finish detail for your Moduleo Roots**

This small element adds a refined, high-end feeling to your floor. It comes in 4 colours and has the perfect height to finish off your floor neatly, or give the transition between your floor and entrance mat an extra touch. (for installation on Flex Pro or a conventional glue installation).

## Stair nosing profile

**A smooth transition from floor to stairs**

Found a floor that feels like you? With our innovative stair nosing profile, you can use the exact same design for the steps of your stairs.

## Joint sealant

**Fills small joints and imperfections**

By closing and removing any gaps with the dedicated Joint sealant, you protect your Roots floor against dirt and moisture. Available in different colours you can mix.

# Hassle-free installation

## FlexPro

**For a smart installation**

With the FlexPro underlay, you can easily install your Moduleo Roots flooring. Just roll out the underlay and gradually remove the protective foil. It's seamless and fast. No need for primer, levelling substance or messy adhesives. Once the work is finished, just roll the flooring thoroughly with a heavy-weight floor roller (min 50 kg) to activate the adhesive. Your floor is ready to walk on. No annoying smells, no noise, no hassle. Subtle irregularities? No sign of them.

Here's what else you can benefit from:

1. Easy to remove. Without damaging the subfloor.
2. Suitable for castor chair use
3. Absorbs sound.
4. Feels warm.

## Floor adhesives

**Pressure-sensitive adhesive**
The all-round adhesive

Placing our Roots floors onto sound and dry subfloors? An A+ label, EC1, Solvent free, low emission adhesive ensures excellent adhesion of the floor.

**High-temperature adhesive**
For temperature-sensitive areas

If your space is exposed to direct sunlight or excessive heat, this heat-resistant adhesive is the way to go. Even in full sun, it guarantees impeccable stability. Made with a solvent-free low admission adhesive (A+ label).

## Skirting & profiles adhesives

**A go-to for attaching skirtings and profiles**

This adhesive is extremely versatile: it sticks to all materials and substrates and cures in an instant. With its high elasticity and filling capacity, all you need to think about is where to put it—and it will work. MSK is A+ labelled. So, no harmful smells here.

# Keep it clean

5 tips to enjoy your Moduleo floor for life

## Moduleo Cleaning Kit

Whether you're planning to do a quick polish, a spring cleaning or take care of some stubborn stains like shoe polish, ball-point or dispersion paint, the Moduleo Cleaning Kit has a product for each job. Use the Moduleo Daily Cleaner for everyday maintenance, the Moduleo Intensive Cleaner for more persistent dirt and the Moduleo Spot Cleaner for tough stains. Compatible with all Moduleo floors, including Moduleo Roots. Biodegradable.

## Moduleo entrance mat

An entrance mat that keeps the dirt out. Easily and efficiently. Because it removes dirt, absorbs water and oil-based fluids and matches the height of your Roots* floor. It comes in 3 colours aligned with the floor collection. Available in sizes 60x90 cm and 90x150 cm.

* on FlexPro or conventionally glued (dry back)

# LayRed

## Strong core
## Beautiful design

- Extra strong
- Easy-click system
- Beautiful design
- Integrated acoustic underlay (up to 22dB ΔLw)

Our LayRed collection is built to make your floor update as easy as possible. Extra strong and easier to place. No demolishing or levelling needed. It's your go-to renovation floor. A drill? No need for it. A dust mask? Not this time.

### Up for any renovation challenge

The signature red back. That's where this collection gets its name from. Because the unique combination of that extra red underlay and the 12 layers above it, is what makes a LayRed floor fit to simply place on top of your old floor. Even on an uneven surface.

### Up for any style

Thinking of a natural stone or warm wooden look? Or maybe even a herringbone floor? Either way, you'll find it in our LayRed collection. With plank sizes, tile formats and a range of colours and designs, there's enough for you to work with.

### 100% Moduleo

Just like every Moduleo floor, a LayRed floor is easy to install and even easier to look after. They are soft, silent and made to last. Take off your shoes and enjoy.

# Moods

## Creative designs
## Your play

Looking for something different? Feeling creative? Our Moods collection is your playground. The geometric shapes, graphic patterns and powdery new pastels are yours to have fun with.

- Creative designs
- Made to last
- Warm & silent
- Excellent water, scratch and stain resistance
- Excellent dimensional stability

Squares and rectangles are classics, but ever thought about a triangle or hexagon as the base for your new floor? We did. In fact, you'll find different base shapes in our Moods collection. Combine one or more of them and there you have it: a thrilling pattern. One of many in our collection, ranging from natural and sophisticated to wild and dynamic.

Another key part of your one-of-a-kind floor? Texture and colour. Mingle wood tones, stone looks and pastel colours. Or don't. It's your play.

Just like every Moduleo floor, Moods floors are soft, silent and installed in no time. They are made to last and easy to look after.
